

APPENDIX B

SEP AND EECBG UNDERTAKINGS EXEMPT FROM SECTION 106 REVIEW

CATEGORY 1 – No Consultation Required

In addition to the Undertakings provided in Appendix A: WAP Undertakings Exempt from Section 106 Review, DOE and the SHPO have concluded that the following undertakings do not have the potential to cause effects on historic properties per 36 CFR § 800.3(a)(1):

1. General efficiency measures not affecting the exterior of the building:

- a. Energy audits and feasibility studies.
- b. Weatherization of mobile homes and trailers.
- c. Caulking and weather-stripping around doors and windows in a manner that does not harm or obscure historic windows or trim.
- d. Water conservation measures -like low flow faucets, toilets, shower heads, urinals - and distribution device controls.
- e. Repairing or replacing in kind existing driveways, parking areas, and walkways with materials of similar appearance.
- f. Excavating to gain access to existing underground utilities to repair or replace them, provided that the work is performed consistent with previous conditions.
- g. Ventilating crawl spaces.
- h. Replacement of existing HVAC equipment including pumps, motors, boilers, chillers, cooling towers, air handling units, package units, condensers, compressors, heat exchangers that do not require a change to existing ducting, plumbing, electrical, controls or a new location, or if ducting, plumbing, electrical and controls are on the rear of the structure or not visible from any public right of way.
- i. Adding or replacing existing building controls systems including HVAC control systems and the replacement of building-wide pneumatic controls with digital controls, thermostats, dampers, and other individual sensors like smoke detectors and carbon monoxide detectors (wired or non-wired).
- j. New installation of non-hard wired devices including photo-controls, occupancy sensors, carbon dioxide, thermostats, humidity, light meters and other building control sensors, provided the work conforms to applicable state and local permitting requirements.
- k. Adding variable speed drive motors.
- l. Insulation of water heater tanks and pipes.
- m. Furnace or hot water tank replacement that does not require a visible new supply or venting.

2. Insulation measures not affecting the exterior of the building:

- a. Thermal insulation installation in walls, floors and ceilings (excluding spray foam insulation).
- b. Duct sealing, insulation, repair or replacement in unoccupied areas.
- c. Attic insulation with proper ventilation; if under an effective R8 - add additional R-19 up to R-38 (fiberglass batt only).

- d. Band joist insulation - R-II to R19 as applicable.
- e. Water heater tank and pipe insulation.

3. Electric base load measures not affecting the exterior the building:

- a. Appliance replacement (upgrade to Energy Star appliances).
- b. Compact fluorescent light bulbs.
- c. Energy efficient light fixtures, including ballasts (replacement).
- d. LED light fixtures and exit signs (replacement).
- e. Upgrade exterior lighting (replacement with metal halide bulbs, LEDs, or others) along with ballasts, sensors and energy storage devices not visible from any public right-of-way.

CATEGORY 2 - No Consultation Required if Qualified Staff Verify that Work is Consistent with the Secretary of the Interior's Standards for the Treatment of Historic Properties (Standards)

1. Efficiency and repair measures:

- a. Painting over previously painted exterior surfaces, provided destructive surface preparation treatments are not used (such as water-blasting, sandblasting and chemical removal).
- b. Installation or replacement of an extension to a downspout, provided that the color of the extensions is historically appropriate for the period and style of the property.
- c. Repairing or upgrading electrical or plumbing systems and installing mechanical equipment, in a manner that does not permanently change the appearance of the interior or exterior of the building.
- d. Installation of new HVAC equipment (such as pumps, motors, boilers, chillers, cooling towers, air handling units, package units, condensers, compressors, or heat exchangers) in a manner that does not permanently change the appearance of the building.
- e. Integrated shingle-style or thin film solar systems on the rear roof of the structure, behind the parapet or not visible from the public right of way.
- f. Solar systems (including photovoltaic and solar thermal) not visible from the public right-of-way and if ground-mounted can be installed without ground disturbance and if roof-mounted will not require new building reinforcement.
- g. Wind system additions to existing wind power facilities that will not require ground disturbance and if building mounted will not require building reinforcement.
- h. Lead-based paint abatement in accordance with the *Standards and Preservation Brief #37*.
- i. Building cleaning in accordance with the *Standards and Preservation Briefs #1, #6, and #10*.
- j. Repairing masonry, including re-pointing and rebuilding chimneys in accordance with the *Standards and Preservation Brief #2*.
- k. New lighting controls including photo-sensors and shading elements if not visible from the public right-of-way.
- l. New metering devices in a manner that does not permanently change the appearance of the interior or exterior of the building, or if the addition is on the exterior of the

structure and is not visible from the public right-of-way.

- m. New water efficient fixtures and fittings in a manner that does not permanently change the appearance of the interior or exterior of the building.

2. Installation or repair of roofing, siding and ventilation:

- a. White Roofs, Cool Roofs, Green Roofs, Sod or Grass Roofs not visible from the public right-of-way.
- b. Rainwater catches and/or gray water systems not viewable from the public right-of-way.
- c. Repair or replacement of existing exterior siding provided that new siding closely resembles the existing siding in dimension, profile and texture.
- d. Flat or shallow pitch roof replacement (shallow pitch is defined as a pitch with a rise-to-run ratio equal to or less than 3" to 12") with no part of the surface of the roof visible from the ground.
- e. Roof repair or replacement with materials that closely resemble the historic materials and form, or with replacement materials that are close to the original in color, texture, composition and form to restore the original feature based on historic evidence, and in a manner that does not alter the roofline.
- f. Installing vents (such as continuous ridge vents covered with ridge shingles or boards, roof vents, bath and kitchen vents, soffit and frieze board vents or combustion appliance flues) if not located on a primary roof elevation or not visible from the public right-of-way.
- g. Installing foundation vents, if painted or finished to match the existing foundation material.

3. Windows and doors:

- a. Installing storm windows, storm doors, or wooden screen doors in a manner that does not harm or obscure historic windows, doors or trim.
- b. Installing insulated exterior replacement doors where the door openings are not altered and are not visible from the public right-of-way.
- c. Window or glazing treatments that do not change the appearance of the interior or exterior of the building, or if the addition is on the exterior of the structure, such as the addition of storm windows.
